The New Era of Education

Vision: Creating the next generation of tech innovators in the region.

Mission & Purpose: To offer students a revolutionized educational experience that allows them to follow their passion and change the lives of many people as a result.

Navigation system: Our Values

Crew: Hungry for growth

Community: Collaborative and united

We navigate through our values

- **Community**

- **Excellence**

- **Humanity**

- **Equality**

- **Drive progress in our community**

Community

Community comes first, making people at the heart of AXSOS academy. Although education is personal and intimate, we can bring the best out of everyone when collaborative education is our core value. AXSOS Academy allows students to have ownership of their education and the education of others, giving them the space to grow in a safe, nurturing environment by encouraging students to help bring the best out of each other.

Excellence

We always have to strive for excellence, we are here to create the next generation of innovators and leaders. Excellence is all about challenging our students to be constantly learning and evolving through quality education and collaboration. Excellence can be achieved through the zero blame, 100% responsibility concept, we all have to hold ourselves accountable for our mistakes, and find zero excuses to be our absolute best. Get things done. Be resourceful. Embrace change, and thrive in ambiguity.

Humanity

Being humane is all about supporting, respecting and accepting one another. AXSOS Academy strives to build an environment that is all about humbleness and fairness, where everyone helps one another to become the best version of themselves without stepping over the boundaries of others. We take mental health support as seriously as we take our technical support, which assures that all the students are staying balanced throughout the program.

Equality

Foster an environment that supports different voices, perspectives, genders and backgrounds that brings us closer to solving problems and exploiting the potential of technology. Don't let the boundaries of our society limit what we can achieve and become.

Drive progress in our community

AXSOS Academy aims to transform the tech ecosystem by graduating thousands of skilled software engineers who drive the progress in making Palestine a self-reliant economy. We support our students post-graduation by placing them in the market and have an impact wherever they go. Our students know that they are part of the community that will drive the change in the future.

“Your personal core values define who you are, and a company’s core values ultimately define the company’s character and brand. For individuals, character is destiny. For organizations, culture is destiny.”
